

Issues with Defi Tokens & DAO.

Most of the altcoins in the crypto market are claiming that their ecosystem supports DEFI & DAO, but the tokenomics and the share of the team is showing something else.

Users buy those coins and after some time realise that those Coins/Tokens have no usage. Even after DAO they were unable to Vote/ Decide about any of the decisions of that Company.

Why ASO is different from other DAO?

ASO token is giving the access to every holder of ASO token to decide about the next moves, listings, marketing & burn.

Burning Mechanism of ASO

0.001% supply will burn on every transaction, more over every month 2 Million ASO token will be burned till ASO owns the blockchain.

ASO Blockchain will only Mint those coins which will be remaining.

How will ASO benefit the Crypto Industry?

ASO is mainly focusing on the usage of Web3.0 portals and Search Engines.

Anyone holding ASO token can take advantage while using any Website, APP/DAPP just to use ASO Search Browser & get ASO tokens.

For Example (Users want to use any P2E or M2E portal than simply use ASO & get rewarded in ASO tokens.

Where ASO will be available to trade?

ASO will be available on Centralised Exchanges such as Bybit, Bitget, Mexc & Ascendex.

What will be the further developments which ASO is planning?

ASO is planning to launch D2E,P2E & M2E functions for the community to make it easier for the community to earn via ASO Browser.

How much ASO planned to give rewards?

Rewards on using ASO browser.

Daily Searches	ASO Token
100	1.5 ASO Tokens
500	4 ASO Tokens
1000	15 ASO Tokens
